**Subject:** Yellowtail Operating Plan

Stefanie:

It was great to meet you on the 12th. Thanks for doing a great job at the meeting!

Here are my comments regarding the plan.

I should note that I support FWP's response, and would add:

Recognizing that the concerns in Wyoming are almost entirely drought related, in the spirit of compromise, we will support your plan, and would emphasize that our preferred minimum flow is 2,500 cfs. If snow packs and reservoir levels allow, we strongly request that river flows be adjusted upward to reflect the improved conditions and forecasts.

Thanks for your help, and keep up the good work!
